This is to record that the undernoted products have been subject to desktop review in respect of meeting the requirements of United States Environmental Protection Agency Vessel General Permit 2013. The product details have been reviewed to establish whether in normal operation the seal presents an "oil to sea" interface.

Products reviewed

SIMPLEX-COMPACT Airspace system (Standard and Yacht version)

Documents Reviewed

System description of SIMPLEX-COMPACT Airspace (Standard and Yacht version)
Installation and operating manual of SIMPLEX-COMPACT Airspace (Standard and Yacht version)
Stern tube lubrication diagram of SIMPLEX-COMPACT Airspace (Standard and Yacht version)

Statement

- The SIMPLEX-COMPACT Airspace (Standard and Yacht version) propeller shaft seals can use mineral oils or environmentally acceptable lubricants as defined within the US EPA VGP 2013 for lubrication.
- The SIMPLEX-COMPACT Airspace (Standard and Yacht version) propeller shaft seals do not have oil-to-sea interface under normal operating conditions as long as they are operated and maintained according to their specific maintenance and service guidelines.
- Therefore the SIMPLEX-COMPACT Airspace (Standard and Yacht version) propeller shaft seals are unlikely to leak mineral oils into the sea during normal operation conditions.
- Therefore, the SIMPLEX-COMPACT Airspace (Standard and Yacht version) propeller shaft seals meet EPA's 2013 VGP requirements of Part 2.2.9 under normal operating conditions and other maintenance requirements mentioned above.
